

Hagens Spring Group introduces

The **Super  
B feder**

**HAGENS SPRING GROUP has been supplying die springs for a number of years, but have just recently entered a partnership, in order to strengthen and to boost the sale of die springs.**

HAGENS SPRING GROUP has been given exclusivity to sell and promote the Super B feder [die springs] in Scandinavia – but also to sell and promote the springs to existing/known customers globally.

It is expected that the Super B feder will be an important part of HAGENS SPRING GROUP's strategic growth in the coming years.

#### **WHAT ARE SUPER B FEDER?**

Super B feder are heavy duty metal compression springs made from rectangular wire – also referred to as die springs [ISO 10243].

Super B feder are high quality compression springs for use in press tools, valves, couplings, brakes, fixtures and other applications where high loads are required in small spaces.

They are ideal for use as heavy duty compression springs for any high stress, heavy load application. Super B feder are color-coded in different colors for easy identification and the trapezoid profile allows a shorter solid length, thereby increasing deflection capacity.

The high permitted level of stress results in a long lifespan.

#### **SUPER B FEDER ARE:**

- Shot-peened for extended lifetime
- Pre-set to avoid loss of length in operations
- Color-coded for ease of identification
- Provided with closed and ground ends

In order to receive more information about Super B feder, please visit our webpage, where you can download the die spring catalogue.

Please note that the Super B feder are supplied in boxes containing a pre-defined number of die springs. The number of springs per box also appears from the catalogue for each type of die spring.

When you have identified the spring [and volume] you need from the catalogue, please contact your usual sales contact at Hagens for quotation and prices.

Besides the abovementioned die springs, HAGENS SPRING GROUP's product programme today consists of: Compression springs, extension springs, torsion springs, pick-up springs, wave springs, disc springs, splitters, rings and several customer-specific products.

Please feel free to send us your enquiry and we will be happy to support you.

Best regards

**The HAGENS Sales Team**
